

## Safety

### Care and Maintenance

### Technical specifications

**-1 SAFETY:** Ensure product is carefully secured when attached to your bicycle and check for stability and tightness of straps, buckles, velcro or any other component, to protect yourself and the objects you are carrying. BBR declines all liability in case of accidents resulting from the incorrect use of its products.

For questions or concerns contact BBR Client Services ([info@borsebiciresnati.it](mailto:info@borsebiciresnati.it))

**-2 CARE :** When positioned under your bike saddle the product has the tendency to collect dirt and dust over time. To refresh, use a damp, soft sponge or cloth, and simply wipe clean. Do not use abrasive materials or harsh chemicals. When completely free of dirt, proceed to step -3 (Drying).

**-3 DRYING AND WATER RESISTANCE:** Our products are made of fine natural leathers that are treated for resistance to atmospheric agents and water. The zippers and internal shell are so designed to guarantee protection and isolation from external elements, like rain and snow, keeping contents dry. In case of prolonged exposure to water, the outer leather will inevitably absorb a percentage of moisture, altering the color but this is easily remedied. In this scenario, consult step -4

**-4 DRYING:** Gently rub the surface of the product with a soft cloth or a dry sponge to remove any dirt, residue and water droplets, then let your **Whale° / Pocket** air dry away from any excessive source of heat (radiators, wood-burning fireplaces, etc.). After cleaning and drying, you can treat the leather as specified in the above step (see step 5) should you desire, always making sure to avoid abrasive materials and aggressive chemicals.

**-5 SURFACE TREATMENT WITH CREAMS AND LEATHER CONDITIONERS:** Our bags are made with care and when treated well are a lifetime investment. To ensure your product stands the test of time, we recommend treating the surface of the product at least once every 12 months or whenever needed, using products specifically formulated for high quality leathers (cream, polish or reviving/sealing agents). Never use aggressive or generic chemical products. For questions contact BBR Client Services ([info@borsebiciresnati.it](mailto:info@borsebiciresnati.it))

*The product you have purchased was thoughtfully handcrafted in Italy using the highest quality treated leather. Over time, leather inevitably undergoes changes in color, texture, and grain that are a distinction not a defect, and tell a unique story. If treated properly, the product you have purchased will faithfully accompany you on your life long journey like a 'trusted companion'. Our bags are designed with the cyclist/adventurer in mind to stand the test of time without compromise to durability, functionality, and safety.*
